

OPERATIONS ATTACHMENT FOR PARAGUAY
MONTHLY REPORT, AUGUST 1981

1. Cruising activities for the first week of the month were dedicated to following the rebellion in Bolivia. Rebels in Santa Cruz maintained a "network" of which Santa Cruz Radio Grigota at 4830 khz, the main station in the network, Robore Radio Robore at 5312 khz, and Montero Radio Norte at 4940 khz were audible at bureau. Originally called "Cadena de Reordenamiento Institucional," the network changed its title to "Cadena de la Dignificación Institucional," and, alternately, "Cadena de la Reivindicación Nacional" after President Luis Garcia Meza resigned and the goals of the rebel movement consequently changed. Generally the network was heard with fair reception, but as the crisis wore on reception deteriorated, due in part to reported interference from La Paz Radio Illimani Network and to interference from a channel marker for a marine frequency, Buenos Aires Radio Pacheco at 4830 khz upper side band. Finally, on 8 August after a press conference by rebel leader Gen Alberto Natusch Busch, the network was disbanded. Cruising continued for several days thereafter with no further sign of the network.
2. Seasonal changes and Radio Moscow beam interfered with bureau reception of Santiago Domestic Service at 15150 khz. A new frequency, 15140, was located which provides fair-good reception at night.
3. Further cruising targeted against Peru was conducted. Cuzco Radio Tawantinsuyo in Spanish was heard with fair-poor reception at 6175 khz, upper side band, broadcasting in network with Juliaca Radio Qollasuyo, Abancay Radio Apurimac, and Quillabamba Radio La Convención carrying a 45-minute newscast at 1130 GMT. Station will be added to emergency frequency list for Peru and checked as a further backstop for coverage. Tacna Radio Tacna has been observed broadcasting alternately at 9505 khz and 9484 khz. Station does not appear to be broadcasting in parallel.
4. Development of a program schedule for Sao Paulo Radio Bandeirantes was further delayed by Bolivian events and by repairs to cruising position.
5. When Paris AFP apparently experienced transmission problems on 26 August and stopped sending, Paraguay was able to backstop by picking up the normally-redundant AFP Portuguese beam, which was transmitting normally with good reception.
6. Three magazines--the Argentine weekly GENTE, the Chilean biweekly COSAS, and the Uruguayan weekly OPINAR--were added to bureau coverage during August.

ENGINEERING MONTHLY REPORT
Paraguay Bureau
August 1981

1. Regional Engineer [] paid a two-week visit to the bureau STAT during the month. Under his guidance several antenna tests were performed at the Bureau and at Antelco site.

The BBH 160 Antenna was tested for MW in both places with negative results for Bolivian and Peru Stations. A temporary long wire Antenna beamed to Santiago de Chile was constructed at Antelco and tested for three days, including night hours. No significant improvement was found. The Regional Engineer will prepare a Report.

2. Complete rewiring of the RF patch was begun. This is to include the replacing of the TGR's multicouplers with the new Delta's. We will report periodically to headquarter on the performance of the new multicouplers.

3. ACCOUNTABLE PROPERTY

Non-Expendable RECEIVED

1. 1 Hetrodyne Notch Filter, S/N 18, from FBIS, Okinawa, \$1000.
2. 1 Hetrodyne Notch Filter, S/N 8, from FBIS, Seoul, \$1000.

TRANSFERRED

1. 1 BBH-160 Antenna, S/N 135, transferred to Key West, \$3,000.

EXPENDABLE RECEIVED

1. 1 File Cabinet, steel, 4 drawers, S/N 7110-242-5593.
